

4 in 1 Emergency Tool

“Web Partner” program

Our website, **OnDuty1.com**, generates thousands of hits each month. Many hits are from professional and government agencies. Our goal is to help narrow searches for disaster preparedness items and kits to companies like yours who carry the 4 in 1 Emergency Tool™. We intend to do this by driving the disaster preparedness industry looking for the 4 in 1 Emergency Tool™ to your website.

Being a **Web Partner** will provide you with the following:

- Create a more user friendly interface to seek out companies who resell the 4 in 1 Emergency Tool™ individually and in their disaster preparedness / C.E.R.T. kits.
- Provide a link to your website and drive potential customers and sales to you.

In Exchange for placement on onduty1.com as a **Web Partner**, we ask that you **feature** the 4 in 1 Emergency Tool™ on your current website **home page** or similar page with our **web banner and pictures** or similar ad.

A **Web Partner Welcome Packet** containing our web banner and 4 in 1 Emergency Tool™ pictures to advertise the tool on your website will be emailed to you.

The On Duty 4 in 1 Emergency Tool™ is an excellent quality item individually or for any kit. It features a gas shutoff, a water shutoff, a pry bar, and a rubbish claw to dig through debris. This creates a big weight savings as a single tool, or in a kit. Not only does it save in the overall cost of these four items, but in overall shipping costs as well.

Visit onduty1.com web partner's page to request your **Web Partner Welcome Packet** or call customer service at **800-8ONDUTY** or email CustomerService@OnDuty1.com.

Thank you,
Don Culotta, President
On Duty Inc.
